Tinker

- Offers online customization of extremely lightweight wheelchairs providing users with complete design freedom prior to purchase

Convaid

- Provides accessible strollers in a variety of models with different functions. Foldable and compact to fit in existing vehicles, eliminating the need to invest in wheelchair accessible cars.

SCI Total Fitness

- Provides in person and online fitness and nutrition programs for people who are disabled yet wish to maintain an active and healthy lifestyle

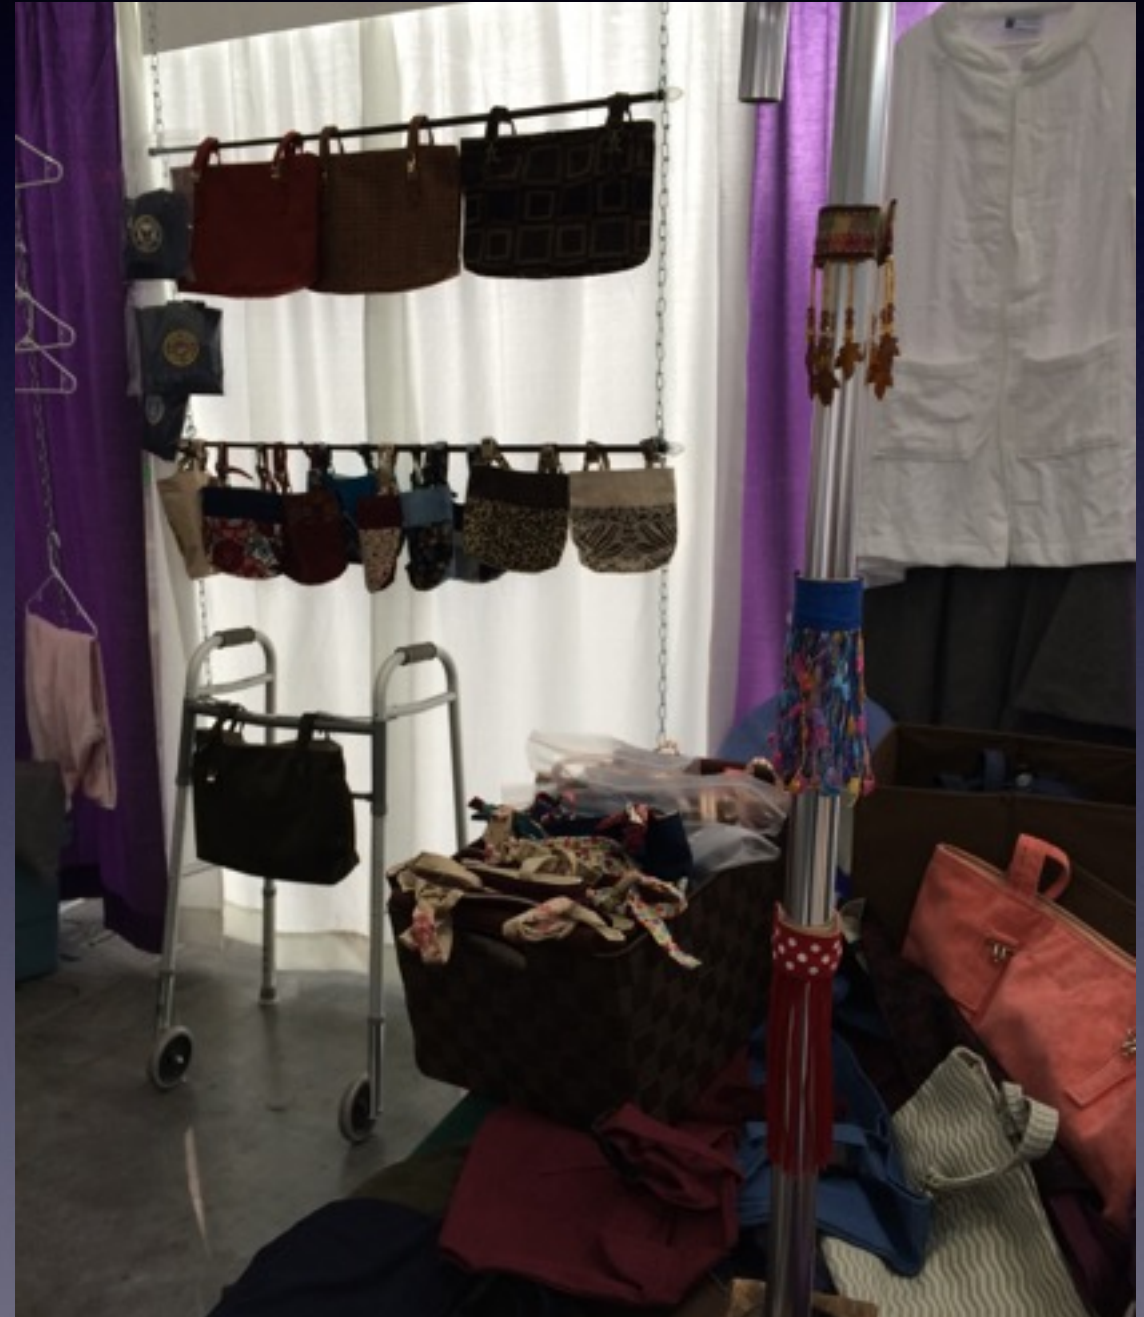

Uber

- Has begun to run wheelchair accessible taxi's through their service. Also has added voice control features directly within the app for easy use.

Granny Jo Products

- Individually started design company specifically for bags and other decorative fashion products for wheelchairs, walkers, canes and other mobility equipment.

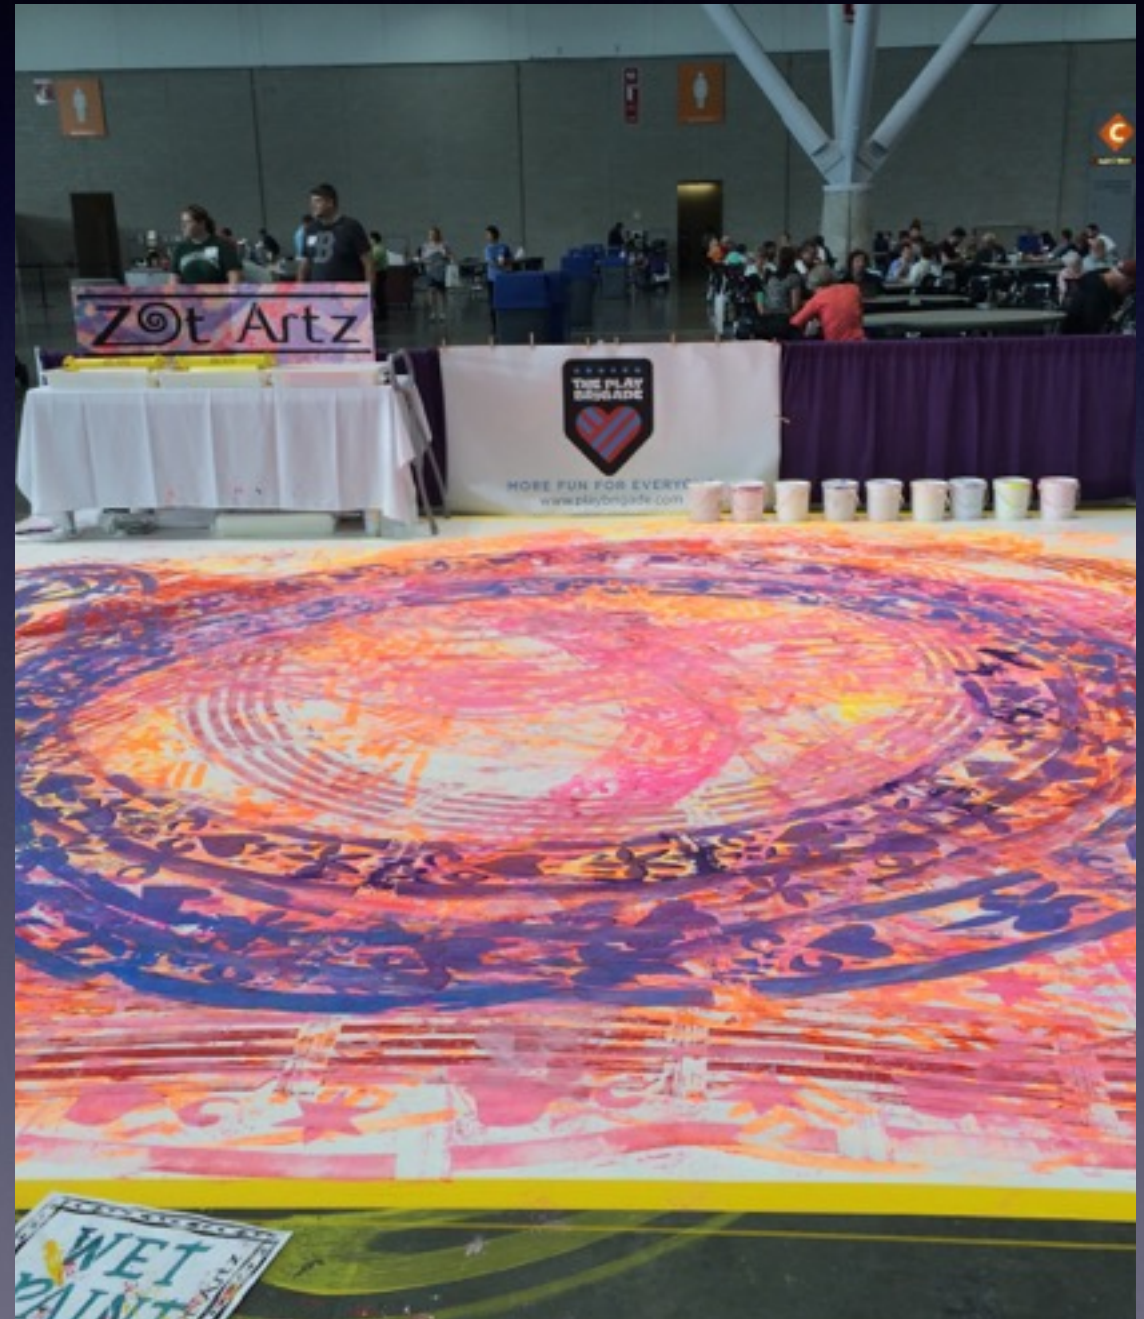

HTS Medallion

- Designs more modern bags and accessories for wheelchairs and mobility devices.

ZOT Arts

- by rethinking how children make art, this company has created new mediums for artists with disabilities to create.

Reach 4 Real

- Adaptive music programs for individuals of all ages with disability to learn music, singing, and dancing. Through student collaboration, instructors create, practice, and rehearse recitals for program participants to perform in front of friends and family.

Go Wing

- Advanced mechanical arm system. Different models can either assist user hand and arm movement, or replace them entirely with artificial appendages.

CapTel

- Assistive home phone, allows for user to read messages on screen as well as voice control and other features on different products.

Assistive Gaming

- Third party developers who have adapted gaming controllers specifically to individual needs

Melio leg bag

- Leg bag for individuals in need of wearable catheter. pump and tube control system allow for simplistic and easy disposal. wearable sensor alerts user when bag needs to be emptied.

Hyperbaric Therapy

- Oxygen pressure therapy chamber. Can help improve the health for individuals with numerous medical conditions as well as injuries. Pressurized oxygen is more easily absorbed by liquids.

Verizon

- Offered no additional services for individuals with disabilities other than functions on devices and assurance on quality customer service
