# Lunch Box Technology Kit

The Lunch Box Kit was created to provide a box of self contained materials designed to facilitate communication and improve social language development during meal time. As mealtimes represent a social setting it is the perfect opportunity to provide experiences that can be generalized into the lives of the students. Mealtime is something that is relevant to the lives of our students and will a little help we can help them to become independently social during these times. Parents will also be able to share in these experiences at home as well. Recipes for communication are a perfect idea for homework and are easily incorporated into home life. It also helps parents to become actively involved with improving communication skills without much effort.

The Lunch Box kit includes the AbleNet assistive technology and the printables materials and all additional support materials are available on the D 75 website under Assistive Technology.

Consider obtaining several of these assistive technology kits per site depending on the number of students at any given lunch period.
