

Using the AT Checklist

In some cases team members are not fully aware of all the assistive technology that might be available to assist with the task that is of concern. In that case there are several tools and resources that can be used to assist them. One of those tools is the AT Checklist. The AT Checklist is a concise listing of assistive technology arranged by the task for which it would be utilized. Categories are: Seating, Positioning and Mobility; Communication; Computer Access; Motor Aspects of Writing, Composition of Written Material; Reading; Mathematics; Organization; Recreation & Leisure; Activities of Daily Living; Vision; Hearing; and Multiple Challenges.

Within each of these categories suggested assistive technology is arranged in a hierarchy from the simplest, low-tech alternatives to more complex or high-tech items. They are arranged this way because the developers shared a belief that we want to select the simplest alternative that successfully assists the student. Many years ago we had a number of experiences where service providers immediately jumped to the most complex solution without first trying other alternatives. The hierarchical arrangement of the items in the AT Checklist is in response to this type of thinking. For example, just because a student has difficulty with writing, does not mean that the first thing we try would be voice recognition. While voice recognition is exciting and very appealing, there are other, simpler tools that should be tried first to see if they work.

You will note that each section also includes a space to write in new assistive technology. Since many new products are introduced each year, it is important to be able to add new items. The final section of the AT Checklist is a place to write comments that the team has as they utilize the Checklist. These may include something that has been tried or a plan to try a sequence of items. It is always important to capture in writing the discussions that take place as team members works together to arrive at an assistive technology decision.

WATI Assistive Technology Assessment Checklist

SEATING, POSITIONING AND MOBILITY	COMPOSITION OF WRITTEN MATERIAL		
Seating and Positioning	☐ Picture Supports to write from/about		
☐Standard seat/workstation at correct height and depth	☐ Pictures with words		
☐ Modifications to standard seat or desk	☐ Words Cards/Word Banks/Word Wall		
☐ Alternative chairs	☐ Pocket Dictionary/Thesaurus		
☐ Adapted/alternate chair, sidelyer, stander	☐ Written templates and Guides		
☐ Custom fitted wheelchair or insert	☐ Portable, talking spellcheckers/dictionary/thesaurus		
	☐ Word processing software		
Mobility	☐ Word prediction software		
☐ Walking devices - crutches/walker	☐ Digital templates		
☐ Grab bars and rails	☐ Abbreviation expansion		
☐ Manual wheelchair	☐ Word processing with digital supports		
☐ Powered scooter, toy car or cart	☐ Talking word processing		
☐ Powered wheelchair w/joystick or other control	☐ Multimedia software with alternative expression of ideas		
☐ Adapted vehicle for driving	☐ Tools for citations and formats		
	☐ Voice recognition software		
COMMUNICATION			
☐ Concrete Representation	READING		
Simple speech generating device	☐ Standard Txt		
☐ Speech generating device with levels	☐ Book adapted for access		
☐ Speech generating device with icon sequencing	☐ Low-tech modifications to text		
☐ Speech generating device with dynamic display	☐ Handheld device to read individual words		
☐ Text based device with speech synthesis	☐ Use of pictures/symbols with text		
Text based device with speech synthesis	☐ Electronic text		
COMPLIED ACCESS	☐ Modified electronic text		
COMPUTER ACCESS	☐ Text reader		
☐ Positioning of student	☐ Scanner with OCR and text reader		
☐ Standard Keyboard/Mouse with accessibility/access features built into the operating system	☐ Text reader with study skill support		
☐ Standard Keyboard/Mouse with Adaptations	MATHEMATICS		
☐ Rate Enhancement	☐ Math manipulatives		
☐ Alternate Keyboard/Mouse	☐ Low-tech physical access		
☐ Onscreen keyboard	☐ Abacus/mathline		
☐ Voice recognition software	☐ Adapted math paper		
☐ Eye Gaze	☐ Adapted math tools		
☐ Morse Code	☐ Math "smart chart'. math scripts		
☐ Switch Access	☐ Math tool bars		
☐ Other:	☐ On-screen calculator		
	☐ Alternative keyboards/portable math processors		
MOTOR ASPECTS OF WRITING	☐ Virtual manipulatives		
☐ Environmental and seating adaptations	☐ Math software and web simulations		
☐ Variety of pens/pencils	☐ Voice recognition math software		
☐ Adapted pen/pencil	D voice recognition main software		
☐ Writing templates	ODC ANIZATION		
☐ Prewritten words/phrases	ORGANIZATION		
☐ Label maker	Self-Management		
☐ Portable word processor	☐ Sensory regulation tools		
☐ Computer with accessibility features	☐ Movement and deep pressure tools		
☐ Computer with word processing software	☐ Fidgets		
☐ Alternative keyboards	☐ Auditory		
☐ Computer with scanner	□ Visuals		
☐ Computer with word prediction	(One animation continued in new terms)		
☐ Computer with voice recognition software	(Organization continued in next page)		

Chapter 1 - Assistive Technology Assessment

ORGANIZATION (continued)	VISION (continued)	
Information Management	Reading	Writing
□ Tabs	☐ Glasses	☐ High contrast pen
☐ Sticky notes, index cards	☐ Color Filter	☐ Portable word processing
☐ Highlighters	☐ Slantboard	device
☐ Key words	☐ Large print	☐ Typing with audio support
☐ Study guide	☐ Optical Magnifier	☐ Braillewriter
☐ Task analysis	☐ Electronic Magnifier	☐ Typing with Braille
☐ Digital highlighters and sticky notes	□ CCTV	support
☐ Handheld scanners/electronic extraction	■ Monocular	☐ Electronic Braille note
☐ Electronic organization	CCTV with distance camera	taker
☐ Study grid generators/grading rubric	☐ Audio text ☐ Voice recognition	
☐ Online search tools	☐ Computer-based reading software	
☐ Online web trackers	☐ Electronic Braille notetaker	
☐ Online sorting file tools		
☐ Digital graphic organizers	Mathematics	
☐ Online manipulatives, interactive, tutorials, animations	☐ Large print measuring tools	
	☐ Large key calculator	
Time Management	☐ Tactile measuring devices	
☐ Checklists	□ Abacus	
☐ Paper planners/calendars	☐ Talking calculator	
☐ Schedules (visual)	☐ Models or 2D and 3D geometric shapes	
☐ Portable, adapted timekeepers	☐ Tiger embossed, PIAF Tactile representation	
☐ Electronic reminders	_	
☐ Digital planners (PDA) cell phones	Pictorial Information	Mobility
☐ Web-based planning tools	☐Enlarged format	□ Cane
	□CCTV	☐ Monocular
Material Management	☐Models or objects	☐ Braille/talking compass
☐ Low-tech organizers	☐ Tactile graphics	☐ Electronic travel device
☐ Checklists	☐ Tactile-audio graphics	☐ GPS device
☐ Container system		
☐ Coding system	Note taking	
☐ Electronic filing and storage	☐ Slate and stylus	
☐ Portable electronic storage	☐ Tape or digital recording device	
☐ Computer-based tools	☐ Computer-based recording software	
	☐ Electronic Braille note taker	
RECREATION AND LEISURE		
☐ Typical toys/puzzles/balls/utensils/instruments adapted;	HEARING	
adjustable equipment; flexible rules; add visual/auditory	Hearing Technology	
clarity	☐ FM	
☐ Specially designed utensils/equipment	☐ Infrared	
☐ Electronically/mechanically adapted utensils and	☐ Induction Loop	
equipment	☐ 1:1 Communicators	
☐ Electronic aids – remote controls, timers, CD players,	☐ Personal amplification	
speech generating devices	-	
☐ Computer-facilitated and computer-based activities	Alerting	
☐ Online and virtual recreational experiences	□Visual or vibrating alerting devices	
VISION	Communication	
Computer access	☐ Telecommunication supports	
□ Color scheme	☐ Closed captioning	
☐ Large operating system features	☐ Person to person	
☐ Built-in magnification	☐ Classroom/group activities	
☐ Fully-featured magnification	☐ Voice to text/sign	
☐ Magnification with screen reader	☐ Real-time captioning	
□ Screen reader		

☐ Screen Reader with Braille device

Additional Tools for the Team as They Select Appropriate Assistive Technology

Closing the Gap Resource Directory and Online Searchable Database

Once the common vendors are known, the next useful tool is the *Closing the Gap Resource Directory*. The Resource Directory is published each spring as the February/March issue of the Closing the Gap newsletter. It is an excellent tool for school teams. The first step in using the Directory is to go to the Producers Section, which is near the back of the directory. In the Producers Section, team members can look at each of the vendors obtained from the Product Description Section of Resource Directory.

In our example, Don Johnston Incorporated was one of the common vendors listed for talking word processors. Looking up Don Johnston Incorporated reveals a long list of products. Scanning that list reveals *Write:OutLoud®*, which sounds like it might be a talking word processing. Turning to the Software section of the Resource Directory provides a description of this talking word processing software, including price, type of computer it runs on, system requirements, and other valuable information.

Closing the Gap also has a searchable database on its website http://www.closingthegap.com/solutions/products/advanced_search.lasso. Annual subscriptions are required to use the online version but there is a free 14-day trial. The same type of information is included there; once the name of a product or the type of product is known, more information can be obtained from the website

QIAT Listserv

Quality Indicators of Assistive Technology (QIAT) is a voluntary organization of AT professionals from around the world who share both ideas and questions. This group is a wonderful resource when looking at the needs of students with AT needs. They provide a collegial support network of some of the finest minds and pioneers in the field of assistive technology. Post questions to this listsery, or share ideas and resources. The site is hosted on the University of Kentucky website. Dr. Joy Zabala is the creator and moderator of the site. http://natri.uky.edu/assoc_projects/giat/

AAC TechConnect

AAC TechConnect has created Device Assistant, a resource designed to provide information on nearly 100 AAC devices currently on the market from major manufacturers. (Information is provided in cooperation with all of the manufacturers.) You can use a feature-match tool to search for a device, and also do side-by-side comparisons. A subscription fee is required, but there is a 14-day free trial. The site was created by Debby McBride, MS, CCC-SLP. http://www.aactechconnect.com/da.cfm
