

### + Quick Setup

- Pair controller with device by pressing the pairing button
- Plug in switch
- Press Program Button
- Press the switch and press the desired controller button then press the Program Button again
- Repeat for all the buttons
- Mount switches wherever desired

### Helpful Settings

**Profile Switch** - This is a helpful feature that will allow you to program 3 different games without having to program a new set each time.

**Combo Buttons** - You can program multiple buttons presses at once just press the combo in the correct order

### Setup Tips

- Start with a simple driving game with only a few switches needed
- Shooter games are more difficult due to aiming
- All types of switches are usable...think outside the box (sound, sip and puff, tilt, twitch, blink)
