

Teacher practices that emphasize the value and practice of learning convey messages of growth, potential, and high expectations to students.

 **Foundation**
Provide challenging learning opportunities focused on conceptual understanding that allows students to grow.

Skill. Teach strategies for successfully taking on challenging tasks that extend the frontiers of students' current ability.

Teach students how to reflect on their progress and adjust perceptions and strategies as needed.

Facilitate reflection

Make clear connections between what students do and their accomplishments.

Teach new strategies

Equip students with tools they need to tackle new challenges.

Praise the process

Encourage different strategies

Encourage students to reflect and try different strategies when they run into difficulty.

Resilience. Create a culture of high expectations and safety that enables students to be resilient academic risk takers.

Help students understand and manage emotional reactions that emerge when learning and challenging themselves.

Show confidence students will meet high standards with the right work and support.

Help manage emotions

Convey high expectations

Set stretch goals

Make it safe to take risks

Make challenging oneself the norm; let students gain confidence by working through tasks just outside their comfort zone.

Teach students how to support each other in taking academic risks and celebrating mistakes as learning opportunities.

Assessment. Teach students the real value of assessments and how they can be used for improvement.

Tell the truth about where students currently are and where they need to be, but be mindful to avoid sending messages about ranking and comparisons.

Explain that tests are not an absolute measure of ability; teach students how to use them to identify areas for growth and learn from mistakes.

Encourage students to revise their work so they can practice and demonstrate increased mastery.

Reframe assessments

Provide truthful feedback

Promote revision

Remember:

Moving forward in learning is a collaboration between the teacher and the student.
